- Charge payments and get e-signatures
- Upload documents and photos, and add comments

For iOS, Android and Windows Mobile

“

Quite easy to use with some great features. The **customer portal is a nice touch**. Customers can have their own log in to view their orders, etc.

QR Codes can also be set up for equipment which when scanned can link to the item page where manuals etc. can be seen.

A **powerhouse** of a package!

“

Overall it's great software. Very easy to get around & easy to learn as well. You can sort the rentals out a variety of ways. As of just recently, it allows you to **issue refunds**, through your credit card company. The Customer Service Team is always available & open to new ideas.

It covers all the bases & encompasses more than if you ran an in house office. **Asset tracking is a definite plus**. Everything you need is right there, online."

- Terri Thomas, Maui Mobility Systems

MAUI MOBILITY  
SYSTEMS™

“ Everything we need in one place; EZRentOut **makes it easy to be professional** and run a business! The navigation, design, and layout are simple, consistent and easy! There's very little delay for teaching new users how to operate the software.

The **history log is excellent**, giving you not only the ability to search through previous orders, but also modify anything. Love the quick search tool, which allows you to easily add items to a new order. Not just that, but it lets you know if items are available or not in the same action as well! Also, integration with QuickBooks!

- Nick Jaicomo, Citizen Cine

“

Fantastic experience! All data at my fingertips! I can keep track of my rental assets; I know when they were purchased, from whom, and for how much. I know which customer has which instrument, and can **keep renters current with payment**. It is no big deal to switch out the instrument the customer has.

**All my assets can be cross-referenced in many ways**. Some I may not have even discovered yet! I can call customers when payment is due, and send depreciation information in a report to my accountant, and EZRentOut calculates it for me.

- Virginia Barnes, Barnes Violins
