“

EZOfficeInventory proposes an excellent service for our company, with a relatively easy to use interface.

This is a great, great asset tracking software, helping us keep track of our office furniture with ease. It is very useful in organizing and keeping track of the technology that we have in use with it.

- Jack Decourt, Amazon

"I am currently using it to organize/maintain a Samples Department where we have samples from all over the world with different specs. Each piece (some have multiple quantities & others are a single item) needs to be tracked with specific details maintained amongst 7 departments & 4 branches. Needless to say, this is an amazing tool to keep control & accountability for the assets.

Their customer service is phenomenal! Every time I have a question they are quick to respond, thorough in their answer (including links) & have even implemented suggestions I had that helped with workflow. The definition of EZOfficeInventory is working smarter & not harder. Keep up the outstanding work! You make my job so much easier!

"

We've been using EZOfficeInventory for about 4 years now, as our checkout system of loaner equipment within our IT department at Stanford Law School. The mobile app is *so easy to use*, and assists us in tracking down loaners.

We will continue to use this service as it is *user friendly and cost-effective*, especially at the EDU discounted price!

- Joe Neto, Stanford Law School

EZOfficeInventory has been an excellent addition to our company. The current features and functionalities have been very beneficial in tracking all of our equipment and inventory.

The customer support is outstanding. They are always listening to requests from their customers for new features, and the fact that they actually implement them is one of the many reasons why we have continued to use it.

EZOfficeInventory has tons of features that you can use as well as options for modifying it to work better for your company, and they are also constantly upgrading, building new features, and enhancing the software to make it even better. I highly recommend it.

About EZOfficeInventory

We launched EZOfficeInventory in 2011 to help equipment intensive organizations increase efficiency and reduce costs. Together with our thousands of customers, we developed and refined best practices in asset management. Thanks to our dedicated team and enthusiastic user base, we've emerged as the leading asset tracking software.

EZOfficeInventory understands the need for businesses to focus on core strengths by not only removing technology related inefficiencies, but also enhancing employee productivity through the optimal usage of assets. Armed with this knowledge, we've served all kinds of businesses – from enterprises to SMBs, and from non profits to industry leaders! If our solution doesn't solve your pain points, we'd like to hear from you at support@ezo.io
